It will be the public's expectation that we are the most knowledgeable stakeholder in this conversation. As I often say, EPA needs to be the smartest person in the room and that only comes from constantly striving to understand and incorporate new science as it is developed (no matter the source.) This case study should give the Agency greater insight into the potential dose-response relationship for PFOA and it may be useful as we consider any read-across approaches to preliminarily assess the large number of data poor PFAS compounds.

> I understand you expressed interest in having NCEA participate in this Workshop. I wanted to let you know that we just cleared Annie Jarabek to attend. Annie is a senior risk assessor in NCEA-RTP, with particular expertise in dose response modeling. Also, Kris is organizing a seminar to invite Mike Dourson to present to the NCEA scientists about this and other work that might be relevant to our risk assessment activities.

> We are pleased to announce the next workshop in the series "Beyond Science and Decisions," which is
continuing and expanding upon the discussion set forth by Science and Decisions: Advancement of Risk
Assessment (NAS, 2009<<http://cfpub.epa.gov/ncea/cfm/recordisplay.cfm?deid=202175>>). The next workshop is
scheduled for February 26 and 27, 2019, at the offices of Texas Commission on Environmental Quality in
Austin, Texas. We have an exciting agenda to share with you at:
https://tera.org/Alliance%20for%20Risk/TCE2018/Beyond_Science2018_Agenda.pdf. The agenda will include
several case studies and multiple talks across a variety of topics.
>
> Registration is free and can be found at:
<https://tera.org/Alliance%20for%20Risk/Workshop/WS10Registration.html>. A block of hotel rooms is being
reserved at the HILTON GARDEN INN AUSTIN NORTH.
